SKILLS

- ❖ Java
- ❖ HTML, CSS, Javascript
- ❖ Python, Django
- ❖ SQL

EDUCATION

- ❖ BE in Computer Engineering | Dattakala Group of Institutions and Faculty of Engineering
Pursuing 4th year
- ❖ Diploma in Computer Engineering | Government Polytechnic Pune 75.53%|2024
- ❖ X | L.G.Bansude Vidhyalay Palasdeo. 97%

EXPERIENCE

- ❖ **Python Full Stack Developer Basics | Kiran Acadamy, Pune**
(21December2025-21January2026)
Work on HTML CSS and Javascrit as frontend designing and on python, Django frame work as backend and we use simple SQL for data storing
- ❖ **Full Stack Web Developer | Elite Softwares**
(7July2025-1October2025)
Work on HTML CSS and Javascrit as frontend designing and on python, Django frame work as backend and we use simple SQL for data storing
- ❖ **Web Designing| Perpectual Inventions**
(june2023-july2023)
Work on HTML CSS and Javascript

CERTIFICATIONS

- ❖ **Full Stack Python Development | Kiran Acadamy, Pune**
(HTML, CSS, Javascript, Python, Django, React, Data Science)
Completed a comprehensive Full Stack Python Development program covering frontend and backend technologies including HTML, CSS, JavaScript, React, Python, and Django, along with basics of data science.

ACADEMIC PROJECTS

❖ Job Portal:

Developed a full-stack Job Portal web application enabling job posting, search, and application workflows. Implemented secure user authentication and role-based access control for job seekers and recruiters. Designed **RESTful CRUD** operations for managing job listings and user profiles, with efficient database integration (e.g., MySQL/ MongoDB). Built a responsive frontend using **HTML, CSS, and JavaScript**, ensuring optimized UI/UX and seamless navigation across modules such as dashboard and job listings.

❖ Data Council Website

The Data Council Website is a multi-page educational platform designed for students who want to learn various tech skills. It is built using **HTML, CSS, and basic JavaScript**, focusing on clean design and smooth user experience. The website includes essential sections like Home, About Us, Courses, Placement Cell, and Contact Us, along with a professional logo. We have also added simple **CSS-based animation effects** to enhance the visual appeal. Overall, it represents a company-style website that provides different learning opportunities for students interested in technology.

❖ CV Classification System

To provide an effective and accurate information extraction of a job aspirant or a candidate using the Resume as an input through the use of **Natural Language Processing** and classify it according to the job description. We have done this using **java swings**, **net beans** is used for building this project.

ACHIEVEMENTS / HOBBIES

1. Achievements:

- Completed a certification course on 'Basics of Computer network' from teachment platform.
- Participated in AI workshop conducted by Nextwave where I learned about basic Ai chatbot integration.
- Attended a 3-Days SQL workshop organized by LetsUpgrade, gaining hands-on experience in database management.

2. Hobbies:

- Exploring new technologies and coding skills.
- Sketching and exploring creative designs.
- Writing poems engaging in thoughtful or reflective thinking.
- Reading books, especially those that inspire creativity and personal growth.
- Web designing and experimenting with modern front-end frameworks.
